

E-commerce Order Management System

Order Capture:

1. Valid across UPI, cards, wallets, and Cash on Delivery before order confirmation.
2. Runs real-time risk assessments against fraudulent transactions.

Inventory:

1. Instantly decrements stock levels across vendor listings to prevent overselling during high-concurrency events like Big Billion Days

Fulfillment:

1. Invoice Generation
2. Publishes live tracking telemetry from dispatch to last-mile delivery

Return access:

1. Automates return merchandise authorization (RMA), assigns pickup agents, and executes quality checks upon return arrival.
2. instant refund process
